PROFESSIONAL SUMMARY

Software professional with 2+ years of experience developing and testing enterprise jewellery-industry applications using CFML, Java, SQL, and Apache POI. Hands-on experience across functional, UI, exploratory, boundary, and compatibility testing for production modules, including form validation, OTP authentication, and cross-browser behavior. Recently completed structured QA training and an internship focused on manual testing methodologies to formalize a transition into a dedicated Software Testing role.

WORK EXPERIENCE

Associate Software Engineer | Techversant Infotech Pvt Ltd, Trivandrum *Dec 2023 – Apr 2026*
Project: CH Hakimi

- Developed a custom quote sheet generator for a Canadian warehouse using Apache POI, with dynamic pricing, gemstone details, and embedded product images.
- Developed and tested jewellery item management modules with detailed validation for stone specifications, product attributes, tax calculations, and shipping information.
- Designed, developed, and tested intuitive UI components for inventory, repair, and invoicing modules to improve user experience and reduce input errors.
- Performed functional, UI, and exploratory testing across core application modules to identify usability and functional issues.
- Tested jewellery item listing forms using valid, invalid, and boundary input combinations to verify data validation and application behavior.
- Developed and tested OTP-based email login functionality, including OTP validation, expiration handling, resend flow, and secure authentication.
- Conducted compatibility testing across browsers and devices to ensure consistent functionality and responsive UI behavior.

Software Tester Intern | Rogersoft Technologies Pvt Ltd *Apr 2026 – Present*

- Created 30+ test cases for the Andon Matrimony landing page (demo site), covering positive, negative, boundary, and non-functional scenarios.
- Identified 10+ bugs — UI, functional, and non-functional — in the demo site using exploratory testing techniques.
- Logged and tracked bugs manually using Excel and Trello.
- Performed black box testing techniques on login page functionality.
- Prepared test scenarios and test case reports manually in Excel.

EDUCATION

Master of Technology, Computer Science *Kerala Technological University*
Completed: August 2022

CERTIFICATIONS & SKILLS

- Certifications: Software Testing Training — Rogersoft Technologies Pvt Ltd
- Testing: Manual Testing, Selenium (Learning), Black Box Testing, Boundary Testing, Exploratory Testing, Compatibility Testing, SDLC, Scrum
- Languages: Java, SQL, CFML, CFC, HTML, CSS
- Tools: Jira, Trello, Git, Apache POI, Microsoft Excel
